

Career Opportunities with Trusol Limited

Trusol Limited are expanding their specialist engineering team.

We are looking to strengthen our installation teams with the following role:

Audio Visual (Installation, Commissioning & Service) Engineer

Outline

Installation and service of audio visual equipment at our client's facilities across the UK (mainly in London) in the leisure, education, and commercial sectors.

To include

- Installation, commissioning and support of general audio visual systems from background music through to fully automated sound, light and video studios within Leisure Centres.
- Servicing and Installation of signage systems, video walls and meeting room systems into corporate client's premises.
- Installation & commissioning of Television distribution systems (F-IRS) into client premises and new build projects.
- Installation & Commissioning of Cellular repeater systems into client's premises.
- School hall sound, light and projection systems for theatrical and general assembly use.
- Installation of classroom interactive solutions and classroom audio systems
- Diagnosis and repairing faults on site, working with the internal helpdesk support team to ensure excellent client service

The work is mostly in London and the South East of England but the ability to travel and where necessary stay away overnight, may from time to time be required.

We offer attractive employment packages depending on previous experience levels, with good training and development opportunities.

Desired personal attributes

- Punctual, trustworthy, enthusiastic, self-motivated and pro-active individuals, capable of working on their own or as part of a larger team
- A forward thinker with the ability to plan & prioritise tasks.
- Independent and organised with good time management and punctuality
- Good customer and peer communication skills
- A strong interest in IP, Audio Visual technologies and integrated solutions
- Excellent computing skills with a knowledge of basic network configuration
- Attention to detail and the ability to accurately record all important information

Preferred requirements

- Minimum 3 years' experience in installing audio visual systems (ideal but not essential)
- Ability to liaise with clients when on site to coordinate works as required
- Ability to report daily to your line manager on works completed, outstanding tasks and another other relevant information

Essential requirements

- Full UK driving license
- You must already have the legal right to work in the UK
- No criminal convictions on record - DBS/CRB checks will be undertaken in order that you can work on many of our client sites

Desirable skills

Installation experience of leisure and commercial audio visual systems in one or more of the following disciplines:

- Multi-zone audio systems for the retail and leisure sector
- Screen and projection systems for signage, communication and live streaming
- Video wall system installation and control
- Lighting systems including DMX and LED pixel tape
- Education or fitness industry audio visual systems
- Data infrastructure installation, service and maintenance
- Aerial and satellite, IPTV and TV signal distribution systems (IRS/FIRS)
- Automation and control systems
- Cellular Repeater / DAS systems

Desirable qualifications and training

- ECS or CSCS skill card
- CTS or similar audio visual qualifications
- Electrical or cabling installation qualifications are an advantage

Trusol offers comprehensive training and skills development.

Package

An initial 6 month probationary period with the potential of a permanent employment contract after this period

Permanent Employment Contract (after 6 months if both parties are happy)

- Permanent Employment Contract (45 hours per week)
- Negotiable salary depending on experience levels and skillsets
- All sensible and pre-agreed work related expenses paid
- 22 days paid holiday, increasing by 1 day for every year worked up to 25 days.
- Enrolment onto Company Pension Scheme
- Good career progression opportunities available
- Training opportunities
- Vehicles, laptops and phones available for some roles.
